PROBLEMS OF INFORMATION TRANSMISSION

Volume 31, Numbers 1-4, 1995

(A translation of *Problemy Peredachi Informatsii*)

Engl./Russ.

Volume 31, Number 1, January-March, 1995

INFORMATION THEORY AND CODING THEORY

An Effective Method for Encoding Information Sources Using the Fast Multiplication Algorithm - B. Ya. Ryabko 1 3

Upper Bounds on the Probability of Nondetected Error - G. L. Katsman 10 13

Asymptotics of Fisher Information Under Weak Perturbation - V. V. Prelov and E. C. van der Meulen 14 17

Application of Formal Grammars for Encoding Information Sources - E. V. Kourapova and B. Ya. Ryabko 23 28

METHODS OF SIGNAL PROCESSING

Image Processing for Plane Domains: Change-Point Problems for the Domain's Area - M. I. Freidlin and A. P. Korostelev 27 33

Lower Information Bounds for Adaptive Tracking of a Linear Discrete Plant - A. V. Nazin and A. B. Juditski 46 56

Filtration of Time-Continuous Stochastic Signals by Discrete Observations With Memory - O. L. Abakumova, N. S. Demin, and T. V. Sushko 57 68

LARGE SYSTEMS

Unimodality of the Distribution of the Number of Pulses for Gaussian Optical Fields - Yu. P. Virchenko and A. S. Mazmanishvili 72 84

On the Limit Distribution of the Distance Between a Random Vector and Some Binary Codes - S. I. Chechiota 78 90

COMMUNICATION NETWORK THEORY

Recurrence Method for Teletraffic Evaluation in Serial-Parallel Telecommunication Nets - A. V. Klimov, S. A. Kolbasyuk, and V. I. Neiman 86 99

Volume 31, Number 2, April-June, 1995

INFORMATION THEORY

Capacity of the Arbitrarily Varying Channel under List Decoding - V. M. Blinovsky, P. Narayan and M. S. Pinsker 99 3

Multi-Alphabet Universal Coding of Memoryless Sources - Yu. M. Shtarkov, Tj. J. Tjalkens, and F. M. J. Willems 114 20

CODING THEORY

On the Decoding of Some Exceptional Ternary Codes - S. M. Dodunekov and J. E. M. Nilsson 128 36

Bounded Minimum Distance Decoding of (P)UM Codes Based on RS Codes - U. Dettmar and U. K. Sorger 135 44

Decoding by Generalized Information Sets - E. A. Kruk and S. V. Fedorenko 143 54

Construction of a Constant-Weight Code of Weight 2 Correcting One Localized Error - V. S. Lebedev 150 62

	Engl.	Russ.
On the Construction of Trellis Codes Based on (P)UM Codes over $\mathbb{Z}_4$ - R. Kötter, U. Dettmar, and U. K. Sorger	154	67
Asymptotically Optimal Binary Codes of Polynomial Complexity Correcting Localized Errors - R. Ahlswede, L. A. Bassalygo, and M. S. Pinsker	162	76
Nonbinary Convolutional Coding in Channels with Jamming - K. Sh. Zigangirov, S. A. Popov, and V. V. Chepyzhov	169	84
COMMUNICATION NETWORK THEORY		
A Random Multiple Access Algorithm with Finite Stack and Packet Loss - S. P. Fedortsov and N. A. Ryleeva	184	102

Volume 31, Number 3, July-September, 1995

INFORMATION THEORY		
Relative Informativity and a Priori Information in the Category of Linear Information Transformers - P. V. Golubtsov	195	3
The Law of Large Numbers for Capacity of Memoryless Channels with a Random Matrix of Transition Probabilities - A. S. Ambrosimov and A. N. Timashev	216	24
Two-Channel Digital Complexing of Continuous Measurers - A. N. Detkov	225	35
CODING THEORY		
Algorithms of Two-Dimensional Discrete Orthogonal Transforms Realized in Hamilton-Eisenstein Codes - V. M. Chernov	228	38
Orbit Partition of a Vector Space over $GF(2)$ under the Action of the Linear-Fractional Group - A. R. Ahkiamov	236	47
LARGE SYSTEMS		
Ergodicity Properties of Stochastic Processes that are Functions of Stationary Gaussian Processes - N. P. Zabotina	244	56
Markov Processes with Asymptotically Zero Drifts - M. V. Menshikov, I. M. Asymont, and R. Iasnogorodskii	248	60
COMMUNICATION NETWORK THEORY		
On Application of Stochastic Processes of the Stock Theory to Modeling Computerized Information Networks - M. Ya. Postan	262	76
The Limiting Departure Flow in an Infinite Series of Queues - N. D. Vvedenskaya and Yu. M. Suhov	284	100

Volume 31, Number 4, October-December, 1995

INFORMATION THEORY		
Optimal Filtering of a Gaussian Signal Against a Background of Almost Gaussian Noise - M. S. Pinsker and V. V. Prelov	295	3
Weighted Voting in Multichannel Systems of Discrete Signal Transmission - Yu. A. Zuyev and S. K. Ivanov	312	22
CODING THEORY		
A Simple Proof of the Main Inequalities for Fundamental Parameters of Codes in Polynomial Association Schemes - V. I. Levenshtein	325	37

	Engl.	Russ.
METHODS OF SIGNAL PROCESSING		
On Sequential Classification of Autoregressive Processes with Unknown Variance of Noise - A. A. Dmitrienko and V. V. Konev	337	51
AUTOMATA THEORY		
On the Synthesis of Circuits Using Unreliable Generalized Contacts - V. V. Tarasov	348	63
Fast Calculation of the Rieman Zeta Function $\zeta(s)$ for Integer Values of the Argument s - E. A. Karatsuba	353	69
LARGE SYSTEMS		
The Best Possible Bounds for Full Rank Probability of a Random Submatroid - V. P. Polesskii	363	81
INFORMATION IN LIVING SYSTEMS		
Using Ideas and Methods of Information Theory in Analyzing the Flexibility of the Language of Ants and Their Aptitude to Add and Subtract Small Numbers - Zh. I. Reznikova and B. Ya. Ryabko	380	100
